

Date: September 24, 2019
Sent on Behalf of: Colleen Lockwood, CFLCA President
To: Fort Lauderdale Mayor, City Commission, City Manager
CC: Greg Stuart, Ben Rogers, CFLCA Board of Directors

Honorable Mayor, Commissioners, City Manager, Mr. Stuart and Mr. Rogers:

On September 23, 2019 the Council of Fort Lauderdale Civic Associations, Inc. (“CFLCA”) held a Board Meeting at the Fort Lauderdale City Hall. Quorum requirements were met and the following Board Members were in attendance: Colleen Lockwood, Stan Eichelbaum, Deborah Rosenbaum, Christina Currie, Mary Peloquin, Marilyn Mammano, Jim Concannon, Michael Albeta, and Kelly Manning.

The matter of the proposed ILA between the City of Fort Lauderdale and Broward MPO was again discussed at length as it is a matter of great concern to our members.

Upon close of discussion the CFLCA Board of Directors *unanimously* voted to make the following request to City Officials.

Now that the proposed ILA between the City of Fort Lauderdale and Broward MPO is on hold pending additional discussion & negotiations the CFLCA Board of Directors respectfully requests that the attached “Suggested Continuing Responsibilities of the Transportation & Mobility Department” be incorporated into the ILA discussion/negotiation.

This request is in addition to the request we made for the following which have yet to be fulfilled: “that City expeditiously hire a full time dedicated Transportation and Mobility Director for the Transportation and Mobility Department *and* provide the organizational chart/visual chart referenced in by City Manager Lagerbloom at the August 22nd special meeting to CFLCA President as soon as possible.”

Requested materials and responses to this correspondence should be email directed to Colleen Lockwood, CFLCA President, at Colleenlockwood1@gmail.com.

Respectfully Submitted,
Christina Currie, CFLCA Secretary
For Colleen Lockwood, CFLCA President

Suggested Continuing Responsibilities of the Transportation & Mobility Department

- Work with neighborhood associations to draft, design and implement neighborhood mobility plans [e.g. Tarpon River]. (Planner, Engineer).
- Respond to concerns about traffic and transportation problems in neighborhoods such as safety concerns, cut through traffic, crosswalks/signal requests, and inadequate signage. Example actions include speed humps, roundabouts, multi-way stops, 'watch your speed' signs, (Engineer, Planner).
- Plan and implement new sidewalk requests (Engineer for design and construction, Planner for public consultation and help develop plans).
- Research, write and solicit grants from the MPO and other agencies and organizations. Designs and administers grant funded projects. (Planner with support from engineering.)
- Examine and develop timing plans for signals and coordinates with BCTE to implement. (Engineer).
- Provide City expertise and local knowledge for Corridor (Las Olas Corridor, SE 17th Street Corridor, Convention Center, NE 15th Avenue Median, Bayview Drive, North Beach Village, A1A Corridor, and Davie Boulevard) and Development of Regional Impact (DRI). [Engineer, Planner].
- Provide City expertise and local knowledge on FDOT, BC and similar agency proposals that impact the City. Leverages enhancements to benefit City. [Engineer, Planner].
- Examine transportation and traffic effects of proposed developments/redevelopments and encourages improvements. Review and improve Maintenance of Traffic Plans (MOTs). [Engineer].
- Examine and analyze impacts of emerging transportation technologies (e.g. scooters, autonomous vehicles (AV), ridesharing) and proposes infrastructure changes. [Engineer, Planner].
