The Council of Fort Lauderdale Civic Associations Board of Directors is against any civic association being split into two different districts. The current four options are unacceptable as many civic associations are in two different districts on the options presented. No organization can properly function with two different commissioners since commissioners have different views on items like parks, development and traffic.

There was a unanimous vote at this evenings CFLCA Board of Directors for new district map options that do not split any neighborhood or civic association into two different districts.
